

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. LIST
OF THE SPECIMENS OF
LEPIDOPTEROUS INSECTS
IN
THE COLLECTION
OF THE
BRITISH MUSEUM.

BY
GEORGE ROBERT GRAY, F.L.S.

PART I.
PAPILIONIDÆ.

LONDON:
PRINTED BY ORDER OF THE TRUSTEES.

1856.

PRINTED BY TAYLOR AND FRANCIS,
RED LION COURT, FLEET STREET.

P R E F A C E.

THE object of the present Catalogue is to give a complete list of all the genera and species of Lepidopterous Insects known to exist in the different Collections.

The letters *a. b. c. &c.* after the species denote the specimens now contained in the British Museum, followed by the *habitat* and the mode in which each of them was obtained; and the absence of these *letters* indicates the species which are desiderata, and therefore desirable to be procured for the Collection.

The other families are in preparation.

JOHN EDWARD GRAY.

1. The first part of the document is a list of names and addresses of the members of the committee.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major employer of women. In 1980, women made up 40% of the public sector workforce, and by 1995, this figure had risen to 50%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of women in the workforce, and the increasing demand for public services. The public sector has also become a major employer of young people, with the number of young people employed in the public sector increasing from 1.5 million in 1980 to 2.5 million in 1995.

The public sector has also become a major employer of people with disabilities. In 1980, people with disabilities made up 10% of the public sector workforce, and by 1995, this figure had risen to 20%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people with disabilities in the workforce, and the increasing demand for public services. The public sector has also become a major employer of people from ethnic minorities, with the number of people from ethnic minorities employed in the public sector increasing from 1.5 million in 1980 to 2.5 million in 1995.

The public sector has also become a major employer of people who are over 50 years of age. In 1980, people over 50 years of age made up 30% of the public sector workforce, and by 1995, this figure had risen to 40%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people over 50 years of age in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people who are over 60 years of age. In 1980, people over 60 years of age made up 20% of the public sector workforce, and by 1995, this figure had risen to 30%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people over 60 years of age in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people who are over 70 years of age. In 1980, people over 70 years of age made up 10% of the public sector workforce, and by 1995, this figure had risen to 20%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people over 70 years of age in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people who are over 80 years of age. In 1980, people over 80 years of age made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people over 80 years of age in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people who are over 90 years of age. In 1980, people over 90 years of age made up 2% of the public sector workforce, and by 1995, this figure had risen to 5%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people over 90 years of age in the workforce, and the increasing demand for public services.
